

SWIDGET® + Control4®

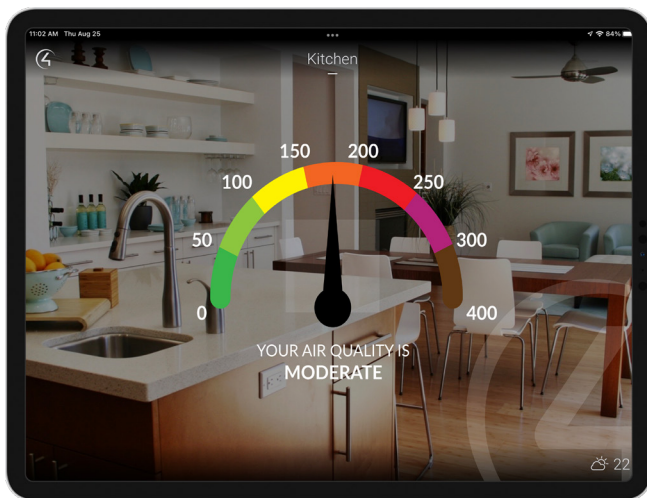

Swidget & Control4 Integration

Swidget's integration with Control4 offers an array of advanced smart home functionalities, allowing custom integrators to design advanced automations leveraging over 20 addressable device variables including temperature, humidity, air quality, motion, and energy use. Empower users with a more personalized and unified smart home system, optimizing the synergy between Swidget's modular smart-enabled products and Control4's robust automation system.

About Swidget

Swidget is a global leader in smart home technology, offering innovative modular smart-enabled products for residential and commercial use. Our devices are installed like any traditional wiring device, and our modular smart Inserts continuously monitor and optimize their environments, making it easy to adapt to evolving needs and technologies. Visit our website to learn more about Swidget's customizable automation solutions.

AIR QUALITY AND SMART VENTILATION

- Enables comprehensive indoor air quality solutions
- Provides real-time monitoring and control over air quality and humidity
- Features auto-ventilation capabilities

ENERGY MANAGEMENT

- Optimizes energy use with scheduling and automations
- Monitors real-time energy consumption and lighting control
- Helps identify energy-demanding appliances
- Reduces bills via smart automation control and notifications

LIGHTING

- Enhances ambiance with Swidget's smart lighting control
- Automates lighting via schedules or automations
- Allows remote control for convenience and energy efficiency

SAFETY & SECURITY

- Features discrete home security solutions
- Includes wireless, battery-less embedded security cameras and motion sensors
- Sends notifications to smart devices
