

Nice

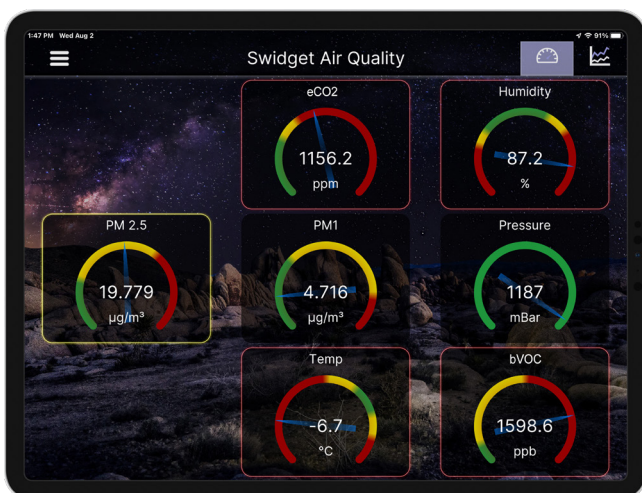

## Swidget & Nice Integration

Swidget's new integration with Nice Home Management (formerly ELAN), offers cutting-edge smart home functionalities, allowing custom integrators to design powerful automations utilizing over 10 addressable inputs, including temperature, humidity, air quality, motion, and energy use. Empower users with a highly personalized and consolidated smart home system, optimizing the connection between Swidget's modular smart-enabled products and Nice's robust automation system.

## About Swidget

Swidget is a global leader in smart home technology, offering innovative modular smart-enabled products for residential and commercial use. Our devices are installed like any traditional wiring device, and our modular smart Inserts continuously monitor and optimize their environments, making it easy to adapt to evolving needs and technologies. Visit our website to learn more about Swidget's customizable automation solutions.

### AIR QUALITY AND SMART VENTILATION

- Leverages Swidget's advanced air quality and ventilation capabilities
- Utilizes Nice's utilities display with intuitive gauges and graphs
- Real-time and historical indoor environment data
- Empowers users to make informed decisions for a healthier living space

### ENERGY MANAGEMENT

- Optimize energy usage with Swidget's Nice integration
- Real-time monitoring of energy consumption
- Identify and manage power-hungry appliances
- Energy bill reduction through smart automation control and alerts

### LIGHTING

- Ambiance enhancement with Swidget's smart lighting capabilities
- Automation of lighting based on schedule or mood
- Remote control for convenience and energy efficiency

### SAFETY & SECURITY

- Discrete home security capabilities
- Wireless and battery-less embedded security cameras and motion sensors
- Notifications on smart devices
- Easy management via Nice integration for peace of mind
